## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1,4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Van de Walker et al. (US 4,321,998). Van de Walker et al. discloses a shell member 10 with anoen end for allowing insertion of an object. A releasable mounting means (the rim) around the opening releasably mount a bottle like article across the opened end to obstruct the open end and keep the object within the shell. The rim has a top bottom and two side walls. Ridges 15 and 15' are projecting from the top or bottom wall. The shoulder is the surface where the article engages the container.

### Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van de Walker et al. in view of McWhirter (US 3,092,244). Although Van de Walker et al. does not disclose a holder as recited in claims 2-3, McWhirter teaches the use of a clip 76 that integrally

formed with the container 10 and projecting from the wall. It would have been obvious in view of McWhirter to provide a clip for attaching the container to another surface.

5. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Van de Walker et al. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the case out of molded plastic material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

## Allowable Subject Matter

- 6. Claims 9-16 are allowed
- 7. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

8. Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners, M.P.E.P. 203.08.
